

Abstract

Program proposal designed according to the perspective of "Social Group Work Method " to promote the awareness of youth towards the styles of handling the problem of unemployment under globalization.

Prepared by

Dr / Nadia Abdelaziz Mohamed Hegazi

Lecturer at department of social work methods, Faculty of Social Work, - Fayoum University

First: Study problem & its importance:

The problem of unemployment threatens the entity of a society politically, economically and socially. It's dangerous not only due to the non-optimal utilization of labor force that is capable of producing, giving and rendering something to the society- (the thing that implies wasting and dissipating expected production that could be realized and used to avail better satisfaction for the society)- but also it's dangerous due to the negative effects based on it.

Globalization led resulted in changing the whole world into a Global village. This occurred due to the enormous revolution in information , communication networks , electronic computers, satellites and global internet networks which entirely ended isolation among countries. This influenced the developing countries where unemployment spread , health & educational services became lower, production decreased and there is inability to satisfy the basic needs. The government is unable to render services thus it seized to take part in the employment policy. Therefore, the role of the Social group Work Method is of great importance, in making the youth perceive the methods of dealing with the problem of unemployment under globalization. Thus the researcher is interested in having a conception for a Program proposal designed according to the perspective of " Social Group Work Method " to promote the awareness of youth towards the styles of handling the problem of unemployment under globalization. This could be realized through increasing knowledge and concepts related to the methods of handling the problem of unemployment under globalization, and making them acquire a group of values and positive trends that could increase their motivation towards using methods of handling the problem of unemployment under globalization. This will help to reduce the problem.

Consequently, the main problem of this study is embodied in the following question:

To what extent are youth aware of the methods of handling the problem of unemployment under globalization?

And what is the program proposal designed according to the perspective of " Social Group Work Method " to promote it?

Second: the study concepts:

The study includes the following concepts:

- Awareness - youth - unemployment - globalization.

Third: the study objectives:

- ١- Revealing to what extent youth realize the reasons for the problem of unemployment under globalization.
- ٢- Revealing to what extent youth realize the methods of handling the problem of unemployment under globalization.

Out of this objective, spouts a group of sub-objectives:

- a) Revealing to what extent youth realize the importance of small projects.
- b) Revealing to what extent youth realize the importance of handwork.
- c) Revealing to what extent youth realize the importance of modern means of technology.
- ٣- Realizing a Program proposal designed according to the perspective of " Social Group Work Method " to promote the awareness of youth towards the styles of handling the problem of unemployment under globalization.

Fourth: the study questions:

- ١- To what extent do youth realize the reasons for the problem of unemployment under globalization?
- ٢- To what extent do youth realize the methods of handling the problem of unemployment under globalization?

Out of this objective, spouts a group of sub-questions:

- a) To what extent do youth realize the importance of small projects?
- b) To what extent do youth realize the importance of handwork?
- c) To what extent do youth realize the importance of modern means of technology?
- ٣- What is the Program proposal designed according to the perspective of " Social Group Work Method " to promote the awareness of youth towards the styles of handling the problem of unemployment under globalization?

Fifth: Methodological procedures of the study:

- ١- **Study Type:** This study belongs to the descriptive analytical studies type.
- ٢- **Used approach:** In this study I use the approach of social survey by sample.

٣- **Study Tools:** In this study the researcher depends on a principal tool that is the scale of youth awareness of the problem of unemployment under globalization which she prepared.

٤- **Study Domains:**

A. **Spatial Domain:** the governorate youth center - Bandar Fayoum is chosen as the "Spatial Domain" of the study.

B. **Human Domain:** the sample size reached ١٠٠ young men.

C. **Time domain:** This study is performed during the period from ١/١٠/٢٠٠٥ to ١/٤/٢٠٠٦ AD

Sixth: Field Study Findings:

The study clarified a group of findings the most important of which are:

- The reasons for unemployment under globalization. As it became clear that globalization resulted in a group of very dangerous factors which contributed in the existence of the problem of unemployment. These factors became more dangerous due to the absence of awareness towards the aspects of globalization.
- Added to this; the findings of the study clarified that youth have a low degree of awareness towards the importance of small projects, handwork and modern technological means as they have a weak degree of recognition of the methods of making use of Information Technology to develop their skills and abilities. They hardly realize that their being aware of modern technology, makes them acquire the necessary skills for handling the problem unemployment.

The study reached a Program proposal designed according to the perspective of " Social Group Work Method " to promote the awareness of youth towards the styles of handling the problem of unemployment under globalization.
