English Language
Time Allowed: ONE (1) Hour

Make Up

1) Write a Curriculum Vitae (CV) to go with application for a job (write a list of qualification skills, and experience)

2) Read the following lines then answer the questions:

In the last decade a revolution has occurred in the way that scientists think about the brain. We now know that the decisions humans make can be traced to the firing patterns of neurons in specific parts of the brain. These discoveries have led to the field known as neuroeconomics, which studies the brain's secrets to success in an economic environment that demands innovation and being able to do things differently from competitors. A brain that can do this is an iconoclastic one. Briefly, an iconoclast is a person who does something that others say can't be done.

This definition implies that iconoclasts are different from other people, but more precisely, it is their brains that are different in three distinct ways: perception, fear response, and social intelligence. Each of these three functions utilizes a different circuit in the brain. Naysayers might suggest that the brain is irrelevant, that thinking in an original, even revolutionary, way is more a matter of personality than brain function. But the field of neuroeconomics was born out of the realization that the physical workings of the brain place limitations on the way we make decisions. By understanding these constraints, we begin to understand why some people march to a different drumbeat.

Choose the correct answer:

1. Neuroeconomics is a field of study which seeks to
 - a. cause a change in how scientists understand brain chemistry.
 - b. understand how good decisions are made in the brain.
 - c. understand how the brain is linked to achievement in competitive fields.
 - d. trace the specific firing patterns of neurons in different areas of the brain.
2. According to the writer, iconoclasts are distinctive because
 - a. they create unusual brain circuits.
 - b. their brains function differently.
 - c. their personalities are distinctive.
 - d. they make decisions easily.
3. The brain works efficiently because
 - a. it uses the eyes quickly.
 - b. it interprets data logically.
 - c. it generates its own energy.
 - d. it relies on previous events.

(1)

4. An iconoclastic thinker
 a. centralises perceptual thinking in one part of the brain.
 b. avoids cognitive traps.
 c. has a brain that is hardwired for learning.
 d. has more opportunities than the average person.

3) Do as required:

1. My friends all can play tennis. (put in the correct sentence)
 2. The President believes that the economy is Improving
 (Correct the mistakes or write "Correct").
 3. You pay on the train, not the station. (Correct "✓" or not 'X')
 4. "I feel sick, Dad: "Well, you..... eaten so much ice cream
 a. can't have b. shouldn't have. (Circle A, B or both)
 5. I..... get home by six o'clock tonight (have to, 've got to, must, ought to)
 (Circle the form that doesn't mean the same as the others)
 6. Normally sushi... With raw fish and rice
 a. is making b. is made c. is being made (Circle the correct form)
 7. They want..... respected. (Put in be, to be or being)
