Abstract:
A Two-Dimensional Model for Transport of Decayables in Groundwater

Abstract:
A Parametric Study for Transport of Decayables in Groundwater

Abstract:
Modeling Saltwater Intrusion in Multilayer Coastal Aquifers

Abstract:
Pumping from Coastal Aquifers

Abstract:
Impacts of Oxidation Pond on Groundwater Contamination

Abstract:
Simulation of Groundwater Flow Remediation at Underground Coal Gasification Sites

Abstract:
Salinity Hazard of Soil Profile in the Nile Delta of Egypt

Abstract:
Scale-Dependent Dispersion Model in Porous Media

Abstract:
Surveying Priorities of Nonconventional Water Resources, Municipal and Industrial Wastewater as Irrigated Resource

Abstract:
Contaminant Transport Modeling at Underground Gasoline Tanks Sites

Abstract:
Scale-Dependent Saltwater Intrusion Modeling

Abstract:
Mitigation of Seawater Intrusion by Pumping Brackish Water

Abstract:
Modeling Nonlinearly Adsorbing Solute Transport in a Confined Aquifer Systems

Abstract:
Impact of Waste Water near Coastal Aquifer

Abstract:
Modeling Contaminant Transport through Porous Media out of Landfills: I. Model development

Abstract:
Modeling Contaminant Transport through Porous Media out of Landfills: II. Model applications

Abstract:
Numerical Solution of the Two-Dimensional Time-Dependent Transport Equation

Abstract :
Contaminant Migration in the Saturated Soil Zone: The Effect of Nonlinearly Sorption

Abstract:
A Two-Dimensional Finite Element Model for Pollutant Transport out of Dumped Disposal sites

Abstract:
Abstract:
Modeling Density-Dependent Flow in Layered Aquifer Systems: II. Model applications

Abstract:
Numerical Solution of the Two-Dimensional Transport Equation with Time-

Abstract:
Modeling Groundwater Remediation

Abstract:
Numerical Analysis of Saltwater Upconing beneath a Pumping Well

Abstract:
Groundwater Management for Salinity under a Pumping Well near a Saline Lake

Abstract :
Groundwater Management for Salinity under a Pumping Well near a Saline Lake

Abstract:
Influence of Natural Recharge on Seawater Intrusion

Abstract:
