Ensaf, A. El Full and Gihan, S. Farahat (2004). Estimation of genetic and phenotypic parameters of some production traits in Japanese quail. **Proceedings of the 55th Annual meeting of the European Association for Animal Production Bled, Slovenia, September 5-9, pp. 77.**

Abstract

Genetic parameters represent an important step in a breeding program design. The purpose of this paper is to estimate inheritance, heritability with different approaches and genetic and phenotypic correlations of lit n i eptembe d
