<b>Abstract</b>	<p>The Study aimed to reveal the relationship between the physical Habitus and the social class in human society from the viewpoint of "Pierre Bourdieu", through a field study in Fayoum Governance. Therefore the study was based on a major question: what is the relationship between the physical Habitus and the social class of Pierre Bourdieu perspective? The study has theoretically relied on the theoretical framework for "Pierre Bourdieu", and for the researcher to achieve the goals of the study, the researcher relied on the "case study" approach, and the researcher used (personal interview / Simple Observation) as tools to collect data from an intentional sample of 12 cases, The study ended with several results, the most important of which are. The sociological treatment that "Pierre Bourdieu" provided to the field of social science showed us that the economic foundation upon which the interoperations and analyzes of the social class had previously depended – as Marx put it – are to longer the only foundations that we rely on. To it, there are even symbolic dimension that are bum of theses economic foundations which may be recognized by the district physical habitus of each social class which is treatment through generation through the process of social</p>
