

The ellipses and the context of the situation and the recipient, Study of Cohesion

Dr. Khalid Hassan Abou-Ghalia

Lecturer- department of linguistics- faculty of Darululoom- Fayoum University

Key Words: criteria Text- Cohesion- Ellipses or deletion- Context-- Situation- The actual or implied reader.

ABSTRACT

The first part of the title of this research is in itself a result of the major search results, That's what it turned out that I rewrote several times; it has been shown to me that ellipses, that I have chosen because that it tool for one of the two means only, are linked with the text itself, namely cohesion and coherence, vs. the five other means that do not relate with the text itself - cannot lead alone to cohesion, but after involvement with other means, I'm going to study here.

The research will prove this, Allah willing, after clarify two things steadfast when many researchers: the first associated with the position of some Western scholars of the context of Situation in cohesion, and I will explained the views of Arab scholars and Their progression. And the other is linked with the work of the recipient in cohesion when ellipses, responded to popular delusion attribute to Western scientists, after having come to receive theoretical and became the recipient of interest, Without stopping at that theory; fundamental reasons will be mentioned, it is most important that this research is interested in the work of the recipient and not receiving how itself; to retain the recipient situated between the ellipses and the types of the context.

The study will conclude with examples of linguistic application of the Holy Quran,, demonstrate the effective correlation between the recipient, the ellipses, and the context of Situation in achieving cohesion, and show what a hidden significance of the text on the other hand.

At this point of view, Talk will be represented in this research, Allah willing, on several points, describes the relationship between the ellipses, the recipient, and the context of Situation, Then applications come. Finale research and results will come as well as a glossary of References.
