Administration and Educational Policies
Faculty of Education
Fayoum University

1446Hj./2024 A.D.

Summary

Managing Research Teams Approach to Improve the Scientific Productivity of Faculty Staff Members and their Assistants at Fayoum University

Research teams are vital entities in the realm of scientific research, with a profound impact on the quality of research output and the speed of achieving innovative results. Academic institutions prioritize managing and supporting research teams to achieve scientific excellence, enhance the quality and quantity of scientific output, promote distinguished scientific publication, secure new research funding sources, and ensure alignment of research team goals with the institution's vision and strategic plan. This approach fosters interdisciplinary integration, promotes the concept of collaborative research, encourages innovation, and enables swift adaptation to environmental changes.
