

## **Evaluation of the Effectiveness of graduates Follow-Up Units in Achieving the Quality of Services Provided to Social Work Graduates**

### **Study Summary:**

the struggle of social work graduate to get suitable job opportunities is increasing in light of Accelerated changes, which may threaten to a dignified life right. Therefore, the Ethical commitment imposes on all societal institutions Responsibility to mitigate this threat.

Achieving this goal requires Achieving quality in all student and graduate services. Accordingly, this study " aimed to evaluate the effectiveness of Graduate Follow-up Units in ensuring the quality of services related to employment, graduate follow-up, training and skill development, and studies and databases provided to social work graduates ". It conducted an evaluative study on the graduates of the Faculty of Social Work at Fayoum University,

The study results indicated that the effectiveness level of Graduate Follow-up Units in ensuring the quality of these services was moderate. The study concluded with a proposed conceptual framework to enhance the effectiveness of Graduate Follow-up Units in achieving quality services for social work graduates and presented several recommendations. The most notable recommendations included designing a strategic plan for the Graduate Follow-up Unit that defines key performance indicators, adopting quality standards that address graduates' training needs, and aligning services with the evolving requirements of the labor market.
