First: the problem of the study:

Is the social services necessary element of human development and will continue to dream of social and economic development just out of reach unless the coverage is comprehensive social and does not lead to basic social services to promote all the positive aspects of social and economic development and confirmation of universality ensures the most important part of any strategy for development. Where it had been the phenomenon of poverty in recent years increasing attention by many of the scientific community and international organizations, research institutions and researchers as the world has witnessed the increasing rates of poverty in the developing and developed countries alike.

Poverty is a result of changes in political, economic and social development that have evolved over time to respond to them or control them. It shows poverty in several types, including response supporters of poor families to bad economic conditions they are experiencing mortgage their personal property, and borrow money from moneylenders, and the establishment of local associations with neighbors to address the economic crisis of emergency, and the use of used clothing, and accept donations, and the prevalence pattern of buying small quantities of food

The current study seeks to achieve the main objective of:
"Selecting Indicators planning to improve the quality of life due to the support groups"

And emerge in a set of sub-goals, namely:

- 1 - defining the categories due to the support for improving the quality of their lives.
- 2 - identify the needs of groups due to the support in order to improve the quality of their lives.
- 3 - Determine the adequacy of support available to the needs of groups due to him.
- 4 - Identification of the difficulties faced by the groups due to the support.
- 5 - proposals face difficulties due to the support groups

thirdly: study questions

Can achieve the objectives of the study by answering the following questions:

Main question of the study:

What indicators planning to improve the quality of life due to the support groups?

Emanating from this question, a number of subsidiary questions are:

1 - What is owed to the support groups to improve the quality of their lives?

2 - What is owed to the needs of support in order to improve the quality of their lives?

3 - What is the adequacy of support available to the needs of groups due to him?

6 - What difficulties due to the support groups?

4 - What proposals for solutions to the difficulties faced by the groups due to the support?

IV: Concepts of the study:

This study is based on the following concepts:

- The concept of poverty.
- The concept of support.
- The concept of quality of life.

Fifth: type of study:

This study belongs under study, descriptive style.

Sixth: The method used:

This study is based on social survey sample as it is the most appropriate curriculum for this study.

VII: Consumer study:

Astbar to the beneficiaries of support.

Eighth: The areas of study:

1 - Spatial domain:

Applied to study the distribution centers of Supply (mystic - Sheikh Hassan - John) in Fayoum Governorate.

2 - Human Limitations:

Sample of the beneficiaries of their support and their number (295) single.

3 - Time domain:

Data collection period which lasted from 27.01.2010 until 04.30.2011

IX: Results of the study:

The study found a range of important results and answer questions about the study and achieve its objectives:

First: the Results of the study indicated that the order of categories due to the support comes as follows:

- 1) seasonal employment and single-parent families, and families have large families and young couples are preliminary due to the support groups.
- 2) street vendors and artisans and owners of marginal employment and employers social security and pension Sadat and Mubarak deserve support.
- 3) The results indicate that income is less than 1500 pounds deserve support.
- 4) pensioners deserve support.
- 5) public sector workers deserve support.
- 6) private sector employees deserve support.
- 7) In the end, the results confirm that support the right of every citizen in the state.

Second: where the results of the study indicated that the needs of groups due to the support in order to improve the quality of their lives:

- 1) the need to restore consumer associations (complexes-governmental organizations).
- 2) the redistribution of each of the (Aladso beans and pasta, tea, poultry, fish and meat) on the card as one of the most important needs of groups eligible for support.
- 3) increase the amount of each of the (sugar, rice and cooking oil, flour) on the card. Chirili and that the amount submitted on the card is not sufficient to sample individuals.

Thirdly: the results of the study indicated that the appropriate support available to the needs of groups due to it appears in the following:

- 1) The study results show that the majority of the study sample consumed the whole supply and it remains something and this shows that the amounts are insufficient.
- 2) clarifies the refusal of the majority to accept a sample of the study support a cash allowance in-kind support.
- 3) show that the quantities ration provided is not sufficient and therefore can not be sold.

IV: the results of the study indicated that the difficulties faced by the groups due to the support of:

- 1) show that the addition of newborns of the main obstacles that hinder the citizens to benefit from support services.
- 2) refers to the suffering of the study sample of a few quantities in the distribution centers.
- 3) describes the difficulty of extraction procedures ration card.
- 4) Chirily traffic on port distribution.

Results answer the third sub-question and determine the effect the proposals address the difficulties faced by the groups due to the support?

- 1) the need to facilitate the procedures to issue the card for all citizens, without condition or restriction so that he can achieve the greatest possible use of the support provided to them and add the birth.
- 2) you must reduce fares to transfer the headquarters of the card.
- 3) need to be linked to the merchant distributor place of residence.
- 4) describes the need to increase the quantities of goods ration Madaompand Altjarmozein.
- 5) refers to the need to divide the people at Trader four weeks in the month to organize the process of obtaining service.
