Reasons for the reluctance of high school students Enrollment for Home Economics Department ""Fayoum Governorate Case Study"

By/ Fatma Nabil Kamal Mohamed

Lecturer of clothing and Textile, Faculty of Specific Education,
Fayoum University

Abstract:

The colleges of quality education are the educational faculties based on the idea of establishing the graduate of the qualitative teacher saturated with a balance of efforts and experiences and studies in which many scientists involved in the affairs of higher education and education. The researcher noted that there is a significant decrease in the number of students enrolled in the department compared to the other departments in the department. The students' enrollment in the department is not without their wishes or prior planning, but according to the internal coordination of the faculty. Therefore, it was necessary to study and study the reasons and reasons of reluctance of students to progress and join the Department of Home Economics to their personal wishes, to try to find out the reasons behind it through the students themselves, and to identify these reasons and try to avoid them.

The aim is to find the factors that affect the low number of students enrolled in the Department of Home Economics, Faculty of Specific Education and how to reach a solution to this phenomenon through a random sample of high school students in the second and third stages of Fayoum Governorate. The importance and role of the Department of Home Economics in society and the labor market are important.

The survey was conducted under the supervision of the researcher on a sample of (600) students in the secondary secondary school in its second and third stages. The questionnaire was verified by the specialists. The questionnaire was applied to the students by giving a score of 1: 5. Somewhat - acceptable - not OK. The questionnaire consisted of (five main items with forty sub-points), and statistical analysis using the statistical package (spss16.0) was used to analyze the results.
