Abstract

An educational unit to enhance the artistic skills of Homes Economics Students

Dr. Fatma Nabil Kamal Mohamed

Lecturer Clothing and Textile Department, Faculty of Specific Education - Fayoum University

The educational unit is the main component of the course, the relationship between them represents the whole part, The educational unit is knowledge and skills to achieve educational goals for students to develop the right attitudes, abilities and skills (Carter, Good.V 1999). The art works are the basic courses that are taught to the students of the fourth year Department of Home Economics Faculty of Specific Education Fayoum University , The course is based on manual skills only and it studies the work of accessories, leather and crystal in a periodic manner The researcher felt that the decision needed to develop to increase the skill of the female students, the idea of the research was added by adding a new educational unit to achieve that goal by teaching them the technique of the beads to produce accessories and new and diverse It is one of the new technologies that have not been studied in the course before and students can take advantage of these skills in the establishment of small projects in the future. In the search for previous studies and research concerning the educational units in the works of art and the beads, the researcher did not find previous studies. Making it seek to prepare this research.

Statement of the problem:

- What is the proposed vision for the educational unit to develop the skills of female students in handicrafts?
- What is the effectiveness of the proposed unit in the development of skills for Knoll beads technology?

Objective:

- The aim of the research is to build an educational unit for manual skills, following the educational principles.
- Measuring the effect of the educational unit in providing some of the manual skills in the course of artistic works for female students.
