

Creative Commons and its role in the protection of intellectual property rights in the digital environment : A case study on the University of Fayoum

Studies on intellectual property rights on the need for awareness of the protection of works on the Internet in addition to the laws and regulations on intellectual property rights, increasingly, at the expense of fair use for the production of intellectual confirmed, a necessary exception to the growth of scientific research and Alaptcarvy community, especially in developing countries. Which called to go to the most important legal licenses Creative Commons licenses creative commons It is not against the copyright for its own sake, but calls for the law to be more flexible and these same goals advocated by the Open Source Software.

The importance of this study is the lack of Arabic studies related to this special by providing information and new trends and to identify the extent of awareness among members of the teaching body of intellectual property rights and the role of Creative Commons licenses in the balance between copyright and the right of society and the extent of their acceptance or rejection of such licenses
