

Linked Data: An applied study on the authors of scientific literature in the field of libraries and information science in the Arab world

Dr. Zeinab Hassan Abu El-Khair

Library and Information Science Department

Faculty of Arts. Fayoum University

The present study seeks to identify the existence of the Arab world within the Linked Data system around the world, through the core authors of both articles and citations within four Arab periodicals in the field of libraries and information science, using both the bibliometric, and the survey methods.

The most important results of the study are only three Arab countries exist within this system, Egypt, Morocco and Lebanon, and the presence of 80% of the core authors within this system.
