

## Form No. (4)

*Name of Candidate :Arwa Karem Mahmoud Abd-Elwahed*

*Degree :PHD*

*Title of Thesis: Thomas' Metaphysics and its impact on  
Francisco Suarez's philosophy of law*

*Supervisors: Professor/ Ibrahim Mohamed Ibrahim Saqr*

*1- Professor/ Sabry Abd-Alla Shendy Mohamed*

*Department: Philosophy Branch ..... Approval .....*

---

### ***ABSTRACT***

This study

The search for Thomistic metaphysics in Suarez's philosophy of law is an invitation for researchers to uncover the ethical principles and foundations behind legal legislation, whether from the perspective of the local community, or from the perspective of the international community. Consequently, morals are fertile ground for the growth of laws, the righteousness of rulers, and the integrity of citizens, and accordingly the researcher can describe the research in the metaphysics of laws at Suarez as a research in applied ethics in laws on the one hand, and a search for the metaphysics of law from an ethical perspective on the other hand. In any case, both Aquinas and Suarez are among the philosophers who precede modern and contemporary philosophers in building a program for world peace between the various nations on the basis of mental and moral principles.
