### ***ABSTRACT***

This study

is interested in studying the concept of civil society in the light of classical and contemporary movements in social theory, through monitoring changes that achieved in this concept through transition revolution on modernity and postmodernism, whereas the western society is exposed a group of structural and intellectual transformations that competed with the emergence of both of modernity phase and postmodernism and these transformations have a deep impact in forming and developing the concept of civil society.

The main objective of the study is directed to know the impact of development in forming the concept of civil society, and this is in the light of monitoring the impacts of economic, social and political changes that is surrounded by the modern and contemporary social theory to visualize the concept of civil society.
