Capacity-building projects in the field of higher education

Erasmus+: Capacity-building projects in the field of higher education' build on the success of the former Alfa, Edu-link and Tempus programmes and aim to:

- Support the modernisation, accessibility and internationalisation of higher education in the Partner Countries;
- Promote cooperation between Programme Countries and eligible Partner Countries (as well as among eligible Partner Countries themselves);
- Promote voluntary convergence with EU developments in higher education;
- Promote people-to-people contacts, intercultural awareness and understanding.

What does it support?

Capacity-bullding projects in the field of higher education are transnational cooperation projects, based on multilateral partnerships, primarily between higher education institutions from Programme and eligible Partner Countries.

Joint Projects operate at micro level and target higher education institutions in the eligible Partner Countries specifically.

They aim to modernise and reform higher education institutions through activities such as:

- Developing new curricula or improving existing ones;
- Improving governance and management systems;
- Building relationships between higher education institutions and relevant socio-economic actors.

Structural projects operate at macro level and target national higher education systems and policies in the eligible Partner Countries. They involve activities such as:

- Modernisation of policies, governance and management of higher education systems;
- Strengthening relations between higher education systems and the wider socio-economic environment.

Projects can involve, where relevant, NGOs, SMEs and any organisations in the field of higher education.

Who can benefit from it?

The focus of capacity-building projects is primarily on the higher education institutions in the eligible Partner Countries. Higher education institutions in the Programme Countries can also benefit indirectly from their participation in the programme.

CULTURAL CENTER

However, academic and administrative staff in higher education institutions, students and public administrations and national authorities (such as Ministries) can all benefit from these projects.

Timetable

The Call for Proposals for capacity-building projects in the fleld higher education was published in October 2014. The deadline for submission of applications is 10 February 2015. Applicants will be notified and the results published in August 2015. The Grant Agreements should be signed in September 2015 and it is hoped that selected projects will be able to start in October 2015.

What support is available?

The grant is intended to support the following costs related to the implementation of the project:

- Staff costs
- Travel costs and costs of stay
- Equipment costs
- Sub-contracting

Who can apply?

The following types of participating organisations can apply for a grant:

- A higher education institution
- An association or organisation of higher education institutions
- For Structural Projects only: a legally recognized national or international rector, teacher or student organisation located in a Programme or in an eligible Partner Country.

This higher education institution/organisation applies on behalf of all participating organisations involved in the project.

How are the applications selected?

All project proposals are assessed by the Executive Agency receiving the application, exclusively on the basis of the criteria described in the Call for Proposals when published.

The assessment implies:

- A formal check to verify that the eligibility and exclusion criteria are respected;
- A quality assessment to evaluate the extent to which the
 participating organisations meet the selection criteria and the
 project meets the award criteria. Such quality assessment is
 carried out with the support of independent external experts.

The quality of eligible applications will be assessed on the basis of the following criteria:

- 1. Relevance of the project
- 2. Quality of the project design and implementation
- 3. Quality of the project team and the cooperation arrangements
- 4. Impact, dissemination and sustainability

What happens when your application is selected?

- All applicants will receive written notification of the outcome of the selection procedure as well as feedback on the evaluation of their application.
- For applications that have been selected for EU funding the EACEA will contact the applicants if any further action is required before awarding the contract.
- EACEA will produce a grant agreement detailing the conditions and the level of funding.
- Further information will be provided at the time of the publication of the Call for Proposals.

Contacts

The EACEA is responsible for the implementation of Key Action 2: "Capacity-building in the Field of Higher Education" of the Erasmus+Programme.

For further information and assistance, please contact EACEA-EPLUS-CBHE@ec.europa.eu

If you are based in a Programme Country but are interested in participating in the international strands of the programme (e.g. Capacity-building in the Field of Higher Education, Jean Monnet and Credit Mobility), you can also contact the International Erasmus+

Contact Point in your National Agency. The list of these persons can be found here.

CULTURAL CENTER

If you are based in a Partner Country, you can also contact the National Erasmus+ Office (NEO) which exists in certain Partner Countries (former Tempus Partner Countries). For the list of these offices, please click here.
